OBJECTIVE

I am a hard-working student majoring in computer science, pursuing positions in full-stack and web development. My expertise in developing applications throughout my coursework and desire to create solutions to real-world problems would be a valuable asset to your organization.

WORK EXPERIENCE

Assistant to Lab Reset - Hillgrove High School

June 2021 - August 2021

- Assisted with reimaging school computers for multiple laptop carts with the school's IT department.
- Assembled new and cleaned out old laptop carts for the upcoming academic year.
- Efficiently supported the IT department with designated tasks and reduced overall project time.
- Transferred and deployed laptop carts to their desired locations throughout the school campus.

EDUCATION

Kennesaw State University

Marietta, GA

Bachelor of Science in Computer Science

Expected June 2026

PROJECT EXPERIENCE

Message Encrypter/Decrypter | Developer, October 2025

- Developed a text file encrypter and decrypter in Java using a Feistel Cipher.
- Utilized Java IO libraries and cryptographic concepts to encrypt and decrypt a user-specified file.

Food Ordering Application | Developer, June 2025

- Created a simple user interface in Java with the Java Swing toolkit for a restaurant food ordering system.
- The application included multiple Java Swing elements to improve customer interactivity.
- The interface output a receipt which improved order clarity for customers and the restaurant.

National Park Database | Database Developer, November 2024

- Developed a national park database within Microsoft SQL Server that included important park and customer account information.
- Organized important information relevant to each park, which could be queried later for business analysis.
